Organised by

### ABOUT US

This is a 2-day ultrasound certification course organised by Malaysian Society of Intensive Care (MSIC). In this course, we will teach what you need to know in critical care ultrasound – cardiac, thoracic, vascular, abdomen and CNS ultrasound. And to complete the certification, participants will need to complete a logbook and go through the board assessment.

### TARGET PARTICIPANTS

It will benefit any clinicians who manages patients in critical care areas – Intensivists, Intensivist in-training, Anaesthetists and Physicians. Participants need to have at least 6 months experience in critical care ultrasound.
