RM300 per sitting. Payment method will be  
informed after registration confirmed.

### ABOUT US

Join our 6-month program featuring two days of in-person sessions with informative lectures and practical, hands-on experience. Gain the chance to do attachment in the ICU. Keep track of your progress with a logbook and case write-ups. Upon finishing your case reports and logbook, you'll be eligible to take the certification exam at the end of the six months. The syllabus includes physics, advanced critical care echocardiography, thoracic scans, vessels and integrative scans for common critical care scenarios.

### TARGET PARTICIPANTS

It will benefit any clinicians who manages patients in critical care areas - Intensivists, Intensivist in-training, and Anaesthetists. Participants need to have at least 6 months experience of basic critical care ultrasound.
